```
        (102, 'Bob', 82000);
```

**BUSINESS ANALOGY**

*"INSERT is submitting a filled-out form into the filing cabinet."*

# DML: Updating & Deleting Rows

- UPDATE: Changes existing values (e.g. promoting an employee).
- DELETE: Removes a row completely.
- CRITICAL: Always use a 'WHERE' clause, otherwise you update/delete the entire table!

```
UPDATE employees
SET salary = 100000
```
